

# SI-HD INK SERIES

## HIGH-DENSITY SILICONE INK

The SI-HD Series by Inkcups is an all new ink for pad printing on silicone items such as kitchenware, pet supplies, promotional products, electronic controls and much more! This two-component ink boasts excellent opacity and a glossy finish. The SI-HD Series dries completely in 4-7 minutes after drying in an oven at least 200°F (93°C). After drying, bend, scratch or even pull the item without any harm to your branding.

The SI-HD Series Ink is classified as NT (non-toxic) and is formulated with pigments which are free from heavy metals. This high-density series comes in a multitude of colors and custom color matches are available upon request!
